 - Poem

Eat more fatty fish

and exercise more. this is what I advise my patients when their good cholesterol is low triglycerides high.

I use a letter a thin piece of paper light on words which makes for quite a lean envelope mostly bones really.

most patients swim past. and yet a few always take the bait ending up in front of crumbled ice and prices per pound.

dressed in workout clothes they ask the man in the plastic smock for a pound of fatty fish—salmon a piece freshly caught.
