Poem

San Antonio Summer '64

...there are approximately 16,300 nuclear weapons located ...in 14 countries.

Bulletin of the Atomic Scientists, 2014

Rising on columns of fire, rockets launched to the moon – and I who'd wished to work with astronauts, am assigned instead

to weigh SAC bomber crew immersed in water – measure "lean body mass," wondered what difference a paunch on a pilot would make sitting in a B52.

Silent—
eyes hidden
behind red goggles,
they swaggered
in their muscled nakedness
into my lab.

Dark-adapted to their cockpits, ready day or night, airborne at the President's command – fly over the pole, drop hydrogen bombs – mutual assured destruction.

MAD it was called.
