

APPENDIX

Short questionnaire (*Kortfrågelista 7*) Folk life Archive at Lund's University, Sweden

- 1) Illness. Did you fall ill from the flu or did somebody you know? What were the symptoms? For how long time were you ill?
- 2) Vaccination. Did you vaccinate against the flu? Why/why not? Did you get a specific call followed by sub-questions or did you contact a vaccination centre yourself? Did the other members of the family also take the vaccination? Do you know if your friends and neighbours were also vaccinated? Did you give a lot of thought to the issue of vaccination? What made you decide?
- 3) Information. Do you remember the first time you heard about the flu? How did you get the information about the flu and about the vaccination? From newspapers, radio, TV, internet, your work, the school, or other? What kind of information did you get? Do you think you had enough information?
- 4) Media. What is true or false, right or wrong, fact or fiction is not always obvious. In the media there have been mixed messages about the reports about lack of vaccine and dangers from the vaccine. Those who have got the flu have talked about the flu, other people have created or spread jokes. Is there something you specifically remember? Something outrageous, thought-provoking, interesting, funny, peculiar, terrible or stupid?
