Appendix one: 31 contemporary projects included in the desktop precedent study, listed according to no. of beds; USA and UK examples colour coded.

A facility is listed as forensic if it accommodates forensic patients either as its primary cohort or as part of a larger patient cohort. Site type was defined as “rural” if surrounded on at least 3 boundaries by countryside and “metropolitan” if located within a dense metropolitan or suburban area and surrounded on at least 3 boundaries by buildings; *(I) denotes a hospital surrounded by an industrial zone.
